

HAMILTON SAFE.

Depositories

engineered to meet virtually
any security demand

HAMILTON SAFE®

Choose the depository

The HAMILTON Model 80UC

A drive-up, or walk-up, depository with extraordinary features including head, chute and chest in one economical, compact unit

- An internal conveyor that senses when the front of the chest and chute are full and automatically moves heavy deposits to the back of the chest
- Greater interior capacity than most depositories
- The chest installs at floor level eliminating the hassles associated with retrieving deposit bags from below floor level
- The depository head is secured to building and chest
- Easy installation in new construction or remodeling

Model 80UC

The HAMILTON DACS

The Depository Access Control System delivers unparalleled security and accountability

DACS features include:

- A receipt for the intended amount of the deposit
- Interior photo evidence of whether or not a deposit was made
- Photographic evidence of who makes the deposit and when
- Card-swipe access that records the time of deposit and card owner
- Easy to use touch screen with Windows NT® interface

to fit your need

The HAMILTON Model 98RH

Replaces virtually any night depository without changes to masonry

- Does not require structural changes to your building
- An ideal upgrade where UL specifications are required
- Installation work can be done from outside the building
- All-weather, stainless-steel construction
- Replaces Mosler, Diebold, Lefebure and others

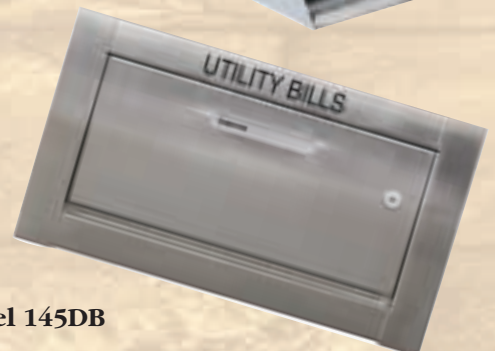

Model 98 RH

The HAMILTON Drop Box

Model 145DB retail depository with built-in theft protection

- Provides high security with an anti-tampering design
- Requires little maintenance with a stainless steel face and drop chute
- Can be customized with any faceplate message
- Access can be limited with a key lock feature

Model 145DB

Hamilton Envelope Depositories

The HAMILTON Model 250 Wells

is a versatile and economical envelope depository that can be adapted to fit different height and volume requirements.

- Stainless-steel face
- Front, or rear, key-lock access
- Can be customized to fit your specific needs

Model 250 Wells

The HAMILTON Model 125SED

A practical through-the-wall envelope depository for:

- Banks
- Credit Unions
- Insurance Offices
- Parking Ticket Payment
- Thrifts
- Utility Companies
- Government Offices

- Stainless-steel face
- Tamper-resistant receiving container
- Heavy-gauge carbon steel receiver

Model 125SED

The HAMILTON Model 68LD

Model 68LD

Built-in night light makes this depository practical for any after-hours application plus, stainless steel construction makes this unit virtually maintenance free.

- Rugged stainless-steel construction
- Built in night light
- Built in envelope supply shelf
